English is the most widely used language in the world. One in every seven human beings can speak English. English has the largest vocabulary, perhaps as many as two million words. English is also a crazy language. There is no egg in eggplant neither pine nor apple in pineapple and no ham in hamburger. Quicksand works slowly, boxing rings are square and guinea pig is neither a pig and nor is it from Guinea. Perhaps all English speakers should be sent to an asylum for the verbally insane. In which language do people recite a play and play at recital ? Have noses that run and feet that smell ? Why do “a wiseman” and “a wise guy” differ in meaning ? Why are “overlook” and “oversee” antonyms ? Why are “quite a lot” and “quite a few” alike ? English was not invented by computers. It has the creativity of the human race. That is why when stars are out they are visible, but when lights are out they are invisible. And why, when I wind up my watch I start it, but when I wind up the essay, I end it.
